CONTENT & SCHEDULE:

DAY ONE

8 AM to 5 PM • In the Classroom

Risk Management, FBO Operations & Line Service Training

Identify, examine and manage the risks at your FBO and develop a comprehensive line service training program for your operation.

Fuel Quality Control Field Testing & Proper Receipt Procedures

Ensure that you only receive and sell quality fuel products.

Fuel Specifications, Distribution & Filtration

Learn the refining process, how distribution is managed and intricacies of fuel filtration.

Misfueling

Reinforce proper fueling procedures to eliminate risks and to promote safety.

Fuel Farm & Refueler Preventative Maintenance

Prevent unexpected breakdowns by maintaining your fuel farm and refuelers.

DAY TWO

8 AM to 12 PM • In the classroom

Ramp Safety & Security Training

Reduce costly safety mistakes.

Develop security procedures for your facilities, aircraft and personnel.

14 CFR Part 139 Section 321 Fire Training

Critical knowledge valuable to everyone and required by many airports.

1 PM to 4 PM • On the Ramp

Hands-On Training

Classroom training is great, but we bring it all to life at the airport where we put into practice what you've learned.
